Brooks 80 Curved Stairlift

Smooth Ride

The rail offers a reliable and smooth ride along the stairs. The stairlift travels along the track in near silent operation.

Extra Comfort

The padded seat and back rest ensures that the Brooks 80 curved stairlift gives the most comfortable ride. The seat height can also be adjusted.

Hinge System

The hinge track is an additional extra when required. It's needed when a doorway or an obstruction is near the bottom of the stairs.

Dimensions

A Overall height	975mm	38.5"

Slimmest Curved Stairlift

The Brooks 80 curved stairlift is a popular solution for curved staircases due to its modern slimline design.

It is a purpose built stairlift for staircases that turn around a bend or corner.

Designed and manufactured in Britain, the Brooks 80 is renowned for its reliability and high quality design. It runs on a highly durable slimline single modular rail which is bespoke to the exact specification of your staircase.

It's a versatile stairlift and can be installed on various configurations from regular curved staircases to ones with multiple turns.

The Brooks 80 curved stairlift also offers super ride quality, featuring comfortable upholstery, a smooth stop and start function, easy to use controls and near silent operation - all as standard.

< Safety Sensors

Safety sensors are located along the carriage sides and around the edges of the foot rest. They will automatically stop the lift if an obstruction occurs whilst travelling along the stairs.

Safety Belt >

The safety belt can be used for added security whilst travelling along the stairs. It fits comfortably around the waist and retracts neatly away once you have finished using it.

Fast Delivery Available

Remote Controls >

Wireless remote controls enable the user to call and send the stairlift up or down the staircase.

Arm Controls >

Easy to operate, even by those with limited dexterity. Simply hold in the direction you require to travel.

Swivel Lever >

The swivel lever is located in easy reach on either side of the chair. When pushed downwards it enables the user to rotate the chair at the top of the stairs.

< Slimline Profile

The arms, seat and foot rest can all be folded up against the wall allowing easy access to the staircase.

Modular Rail >

The rail can be installed on to any type of curved staircase and is a bespoke design. The single rail is slim in profile and attaches directly to the stairs, so there's no damage to your home. The rail is modular so is easily assembled which enables faster delivery.
